

Volunteer Opportunities

The number of homeless along with others unable to afford healthcare or insurance, is growing exponentially. The Gary Burnstein Community Health Clinic's mission is to provide these people with medical and dental care services absolutely free of charge. These services are currently being provided to residents of Grace Centers of Hope one evening per week. However, there are immediate plans to expand these services to the uninsured and underinsured individuals of general community three evenings per week in our new clinic. The new clinic is located at 90 W. University in Pontiac.

When two homeless individuals were asked about the barriers of getting health care they replied; "No insurance means no help" and the second said: "Lack of money and transportation are the biggest barriers. Getting to a pharmacy that carries the medication you need is one thing, but then having a dollar, one rotten darn dollar, can be challenging on occasions."

Our clinic is in need of **volunteer medical staff.**

- Doctors of all specialties
- Dentists
- Nurses
- Physicians Assistances
- Nurse Practitioners
- Dental Hygienists
- Pharmacists

Volunteer non-medical

- File Clerk
- Patient Reception
- Clerical
- Writer (newsletter)
- Outreach

Our volunteers are essential to keep the clinic open and providing patients with needed proper medical treatment.

We are only asking for one evening a week, month, or even a year of your time. A few hours out of your schedule would make the world of difference to a person in need.

We would appreciate any help that you may provide.

Thank you for your time and consideration.

Brian J. Harris
